

GEOD CORPORATION

AERIAL MAPPING · LAND SURVEYING · UTILITY MARKOUTS
A CERTIFIED SMALL BUSINESS ENTERPRISE

Port Authority of NY & NJ On-Call Services

For over 20 years, GEOD has maintained an On-Call Services Contract to provide surveying and mapping services for the Port Authority of NY & NJ at their various facilities located throughout both states. Our current contract includes the preparation of new orthophotography, DEM & vector mapping of approach paths, surface obstruction analysis of over 150 square miles, updating of existing facilities mapping and runway profiles of LaGuardia Airport in Queens, NY, as well as ongoing daily construction survey support at the World Trade Center Construction Sites in Manhattan.

Under prior on-call contracts with the Port Authority, GEOD has provided both updates to existing mapping and new mapping from orthophotography for the approaches to the George Washington Bridge, the Holland Tunnel, and for multiple airports (JFK, Stewart, Newark & Teterboro). We also performed mapping of PATH lines from Newark to Hoboken and Jersey City, and a surface obstruction analysis of 106 square miles for Stewart Airport.

Location: **New York & New Jersey**

Client: **Port Authority of NY & NJ**

Services:

- **Orthophotography**
- **Digital elevation models (DEM) & vector mapping of approach paths**
